

LOCATION OF DEFIBRILLATORS AT THE RA CENTRE

As you know, our League places a strong emphasis on providing the safest environment possible for our senior players. For example, we included in this year's registration form a question on whether or not each player had CPR training. This information was included with the team roster data base. With this goal in mind, the following provides a visual description of where the defibrillators are located at the RA should an emergency situation arise during our games.

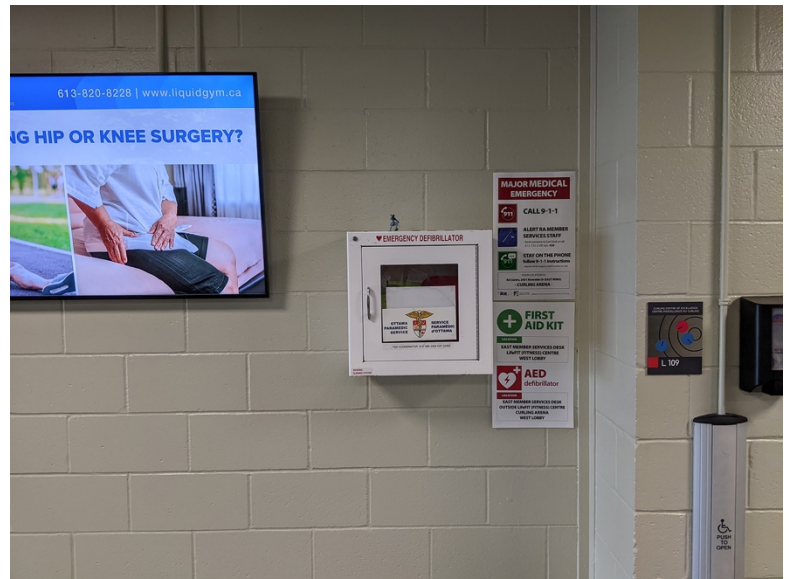

LOCATION 1: EAST WING ENTRANCE

Defibrillator is located on the wall left of the reception desk.

LOCATION 2: KINSELLA ARENA

Defibrillator is beside wall mounted screen on left side of hallway across from lounge area
